Objective

Passionate full-stack engineer having good knowledge of developing scalable websites using a wide range of front-end and back-end skills. I am looking to enhance my skill set while contributing to a positive outcome.

Skills

- **Programming Language**: Java
- **Backend**: Spring Boot, Spring Core, Spring MVC
- **Frontend**: AngularJS, HTML, CSS, JavaScript, Bootstrap
- **Database**: RDBMS, MySQL
- **Cloud Computing**: AWS
- **Tools**: Docker, Git, GitHub

Projects

- **Hospital management system**

  A dynamic and responsive Java Hospital Management Web application managing inventory and laboratory management, as well as patient registration.
  Developed web pages as per requirement using Angular. Created RESTful web APIs to perform CRUD operations on domain objects using Spring Boot and MySQL database. Performed testing using JUnit.

- **Online Quiz Portal Using Rest APIs**

  An online quiz portal with multiple REST APIs where users can browse different quizzes, attempt them, and find their scores.
  Developed the REST APIs using Spring Boot, Spring MVC, Hibernate, and MySQL.

- **Event Management App**

  A single-page application for an organization. The administration team of the organization can view and add their resources such as employees and keep their data for future reference. Developed the front-end of the application using Angular, Bootstrap, HTML, CSS, and JavaScript.

- **mAadhaar Application**

  The application is intended to register citizens and let them display ID to process their Aadhar Card application. Admin approves the aadhaar application and issues a new Aadhaar number.
  Worked as a full-stack developer with key technologies like Spring Boot, MySQL, and Angular.
